

BUILT FOR THE GAME. MADE FOR THE TEAM.

PLATFORM OVERVIEW

The all-in-one baseball platform built for coaches, players and families. Command9 brings team management, game-day operations, player development, communication and advanced pitching intelligence into one connected experience.

From the first practice to the final pitch, Command9 gives coaches the tools to manage their program, develop their players and keep every family connected.

COMING SPRING 2027

BUILT FOR THE GAME. MADE FOR THE TEAM.

01

MORE THAN A TEAM MANAGEMENT APP

Most team apps help you build a schedule and send messages.

Command9 is built to help you run an entire baseball program.

Manage multiple teams. Organize your coaching staff. Track player availability. Score games. Broadcast live video. Monitor pitching workloads. Build development plans. Turn every recorded pitch into actionable information.

All without forcing coaches and families to jump between multiple platforms.

One platform. One team experience. Every part of the game.

02

BUILT FOR EVERY LEVEL OF BASEBALL

Command9 is designed to support organizations and teams across multiple levels of youth baseball.

LEVELS SUPPORTED

- | | |
|----------------|----------------------------|
| — Recreational | — Majors |
| — Premier | — Independent teams |
| — AA Select | — Clubs |
| — AAA Select | — Leagues |
| — Minors | — Multi-team organizations |

Each organization can manage multiple teams, divisions and seasons while every team maintains its own roster, staff, branding, schedule and player data.

03

COMPLETE TEAM MANAGEMENT

Run your team from one place.

Command9 gives team managers and coaches a structured workspace for the administrative side of the game.

ORGANIZATION AND TEAM MANAGEMENT

- Multi-organization support
- Multiple teams within each organization
- Team-level division selection
- Team branding and logos
- Custom team colors
- Team status and lifecycle management
- Organization and team administrative access
- Secure multi-team data separation

SEASON MANAGEMENT

- Create and activate seasons
- Select the current season
- Maintain historical seasons
- Build season-specific rosters
- Assign season-specific coaching staffs
- Preserve historical schedules, pitching data and player statistics
- Track team records by season

ROSTER MANAGEMENT

- Add players individually
- Import complete rosters through CSV
- Allow optional jersey numbers
- Prevent duplicate players and conflicting jersey assignments
- Add existing players to a new season
- Preserve dropped and inactive roster history
- Export current rosters
- Maintain player profiles and photos

COACHING STAFF MANAGEMENT

Build the staff your program needs.

Command9 does not place an artificial cap on coaching staff. Invite the Head Coach, Assistant Coaches, Scorekeepers and additional staff members your team needs.

FLEXIBLE STAFF STRUCTURE

- Head Coach
- Assistant Coach
- Scorekeeper
- Combined Assistant Coach and Scorekeeper access
- Unlimited supporting coaches
- Season-specific coaching assignments
- Custom staff titles

A coach can begin with the title Utility and later be assigned a more specific responsibility, including:

STAFF TITLES

- 1st Base Coach
- 3rd Base Coach
- Pitching Coach
- Hitting Coach
- Catching Coach
- Dugout Coach
- Infield Coach
- Outfield Coach

Staff titles describe responsibilities without changing the coach's underlying system permissions.

05

ONE ACCOUNT. MULTIPLE ROLES.

A coach can also be a parent.

Command9 supports a combined experience without requiring separate accounts or separate apps. A user may be:

COMBINED ROLES

- Head Coach and Guardian
- Assistant Coach and Guardian
- Scorekeeper and Guardian
- Team Owner and Guardian

Coaches retain access to their authorized coaching tools while also seeing the parent experience for their linked player.

One sign-in provides the right experience for every role that person holds.

06

FAMILY AND GUARDIAN ACCESS

Keep families connected without compromising player privacy.

Each player can have up to two active guardians. Neither guardian slot is required, and unused access is never filled with placeholder accounts.

GUARDIAN ONBOARDING

- Direct guardian invitations
- Player registration codes
- Secure player-claim workflow
- Explicit parent-to-player linking
- Up to two guardians per player
- Independent guardian relationships
- Link-specific access revocation
- Existing staff roles preserved when a coach is also a guardian

Command9 never assumes a parent-child relationship from a last name or email address. Access is created only through an explicit, secure player link.

GUARDIAN EXPERIENCE

- Their linked player
- Player profile
- MyStats
- Schedule
- Event information
- RSVP
- Attendance information
- Team communication
- Authorized livestreams and replays
- Guardian-safe pitching analytics

Guardians do not receive access to unrelated players' private information.

07

SCHEDULE AND EVENT MANAGEMENT

Keep the entire season organized.

Command9 gives teams one connected calendar for games, scrimmages, practices and team activities.

EVENT TOOLS

- Games
- Scrimmages
- Practices
- Tournaments
- Team activities
- Arrival times
- Locations
- Event descriptions
- Practice focus areas
- Upcoming and past event views
- List and calendar layouts
- Event editing and cancellation
- Calendar subscriptions
- Team-scoped calendar feeds

Practice events can communicate the purpose of the session with focus areas such as:

PRACTICE FOCUS AREAS

- Baseball IQ
- Baserunning
- Fielding
- Mechanics
- Pitching
- Live Reps
- Outfield
- Catching
- Hitting

08

RSVP AND ATTENDANCE

Know who will be there before the team arrives.

Players, guardians and coaches can respond directly to team events.

RSVP OPTIONS

- Attending
- Not Attending
- No Response

ATTENDANCE INTELLIGENCE

- Player attendance
- Coach attendance
- Practice attendance percentages
- Game attendance percentages
- Overall attendance rates
- Event-level availability
- Team attendance dashboard
- Separate No Response and Not Attending categories
- Guardian-controlled responses for linked players

Coaches can quickly see who is available, who has declined and who still needs to respond.

09

GAME-DAY SCOREKEEPING

Run the game from the field.

Command9 includes an integrated mobile Scorekeeper designed for live baseball operations.

GAME SETUP

- Home or away designation
- Team lineup
- Batting order
- Defensive positions
- Opponent lineup
- Game rules
- Inning configuration
- Run limits
- Ball and strike rules

LIVE SCORING

- Team and opponent score
- Inning and half-inning
- Outs
- Ball-strike count
- Batter
- Pitcher
- Base runners
- Pitch results
- Plate appearance outcomes
- Hits
- Walks
- Outs
- Runner advancement
- Runs scored
- Undo with preserved action history

SCOREKEEPER CONTROL

- One active scorer at a time
- Scoring lock
- Lock heartbeat
- Authorized takeover
- Revision conflict protection
- Idempotent action recording
- Final game confirmation
- Protected finalization and retry

The Scorekeeper connects directly to the live scoreboard and pitching workload system.

10

LIVE BOX SCORE

Follow the game from anywhere.

When an eligible game is actively being scored, Command9 can surface a compact live scoreboard inside the team experience.

THE LIVE BOX SCORE CAN DISPLAY

- Team score
- Opponent score
- Inning
- Top or bottom
- Outs
- Ball-strike count
- Occupied bases
- Live game status

The scoreboard appears only for an eligible active game. Finalized, canceled, deleted or abandoned games are removed from the active Home experience.

11

COMMAND9 LIVE

Broadcast the game directly from a phone.

Command9 Live gives authorized team members the ability to broadcast games through a secure mobile streaming workflow.

BROADCASTING

- Mobile camera broadcasting
- Larix Broadcaster integration
- Team-event stream provisioning
- Secure broadcaster claims
- One controlled broadcasting destination
- Authorized broadcaster management
- Reduced-latency video
- Signed playback
- In-memory playback authorization
- Live viewer experience inside Command9

VIEWER EXPERIENCE

- Watch Live from the event
- Team and opponent identification
- Live scoreboard overlay
- Score, inning, outs and count
- Base-runner display
- Stream status
- Broadcast interruption messaging
- Mobile-focused playback
- Authorized guardian and team-member viewing

STREAM INTERRUPTION AND RECOVERY

- Interrupted-stream detection
- 15-minute reconnect window
- Resume Stream
- Same-session reconnection
- Viewer reconnect messaging
- Client-side reconnect countdown
- Intentional End Broadcast
- Replay processing after the broadcast ends

SECURE REPLAY

- Recording processes automatically
- Replay status is displayed
- Authorized users receive signed playback
- Playback credentials remain protected
- Watch Replay appears when the recording is ready

FEATURING THE BULLPEN

Advanced pitch tracking, statistics and pitching management.

The Bullpen is Command9's dedicated pitching platform. It combines live pitch tracking, player readiness, workload management, location data and development tools in one coach-focused experience.

PITCHER READINESS – EVERY ACTIVE ROSTER PLAYER CAN BE EVALUATED AS

- Eligible – available to pitch
- Warning – approaching the configured limit
- Rest – unavailable, with remaining recovery time
- Maximum Reached – pitch limit reached
- Active Session – currently tracking pitches

COACHES CAN QUICKLY VIEW

- Active pitching sessions
- Eligible pitchers
- Resting pitchers
- Full team
- Current workload
- Season totals
- Last pitching session
- Available return time

CONFIGURABLE PITCHING REGULATIONS

- Warning threshold
- Maximum pitch count
- Required rest period
- Pitching availability rules
- Coach override authority

Command9 applies those settings consistently across Bullpen sessions and scored games.

LIVE PITCH TRACKING

Record more than a pitch count.

The Bullpen tracker allows coaches to record each pitch through a mobile strike-zone interface.

TRACKING OPTIONS

- 5x5 pitch-location grid
- In-zone pitches
- Outside-left pitches
- Outside-right pitches
- High pitches
- Low pitches
- Left-handed batter
- Right-handed batter
- Unknown batter side
- Count-only pitch recording
- Undo
- Finish session
- Cancel zero-pitch session

A coach can record a pitch location with one tap or use Record Pitch — No Location when speed and simplicity matter more than location detail. Count-only pitches still contribute to workload while remaining clearly categorized as Unlocated.

ACTIVITY CATEGORIES

- Game
- Practice
- Scrimmage

This allows coaches to understand how a player's workload and location patterns change by baseball environment.

SPRAY CHARTS AND PITCHING HISTORY

Turn every recorded pitch into usable information.

Command9 converts recorded pitch locations into visual heat maps and pitching summaries.

SPRAY CHART SCOPES

- Session — one exact pitching appearance
- Season — all qualifying pitches in a selected season
- Career — the player's collective Command9 pitching history for that team

SPRAY CHART FILTERS

- All pitches
- Games
- Scrimmages
- Practices
- Left-handed batters
- Right-handed batters
- Unknown batter side
- Combined activity and batter-side filters

PITCH DATA

- Total recorded pitches
- Located pitches
- Unlocated pitches
- Voided pitches
- Inside-zone percentage
- Outside-zone percentage
- High
- Low
- Left
- Right
- Session history
- Season totals
- Career totals
- Active versus completed-session workload

Voided pitches are excluded from official totals. Count-only pitches remain part of workload and appear as Unlocated without being assigned a false chart position.

15

SCOREKEEPER + BULLPEN CONNECTION

One authoritative pitching workload.

When a team pitch is recorded through the Command9 Scorekeeper, it can feed the same Bullpen workload used by coaches. This helps prevent:

PREVENTS

- Missing game pitches
- Double-counted workload
- Separate pitch-count ledgers
- Incorrect rest status

Game pitches, practice pitches and scrimmage pitches contribute to one connected pitching history.

16

VELOCITY TRACKING AND POCKET RADAR

IN DEVELOPMENT

Bring objective throwing data into player development.

Command9 is designed to support velocity data from Pocket Radar and structured CSV imports, allowing coaches to keep throwing measurements connected to the correct player.

VELOCITY TOOLS

- Pocket Radar-compatible data imports
- Multi-player CSV uploads
- Pre-filled roster templates for exact player matching
- Manual velocity entry
- Session date and activity tracking
- Pitching and throwing velocity
- Individual player history
- Session, season and career trends
- Personal-best tracking
- Average and peak velocity
- Development progress over time
- Coach-authorized data access

Imported measurements must match a stable Player record. Command9 does not assign velocity data by guessing from similar names or jersey numbers.

Pocket Radar import capabilities are planned for the Command9 launch roadmap. This section is marked In Development until the complete import workflow is manually verified.

17

MYSTATS

Give players and families a clearer view of development.

MyStats provides a player-focused destination for authorized players and guardians. Depending on available data, MyStats can include:

MYSTATS

- Player identity
- Jersey number
- Player photo
- Attendance
- Event participation
- Pitching workload
- Session history
- Season pitching totals
- Career pitching totals
- Spray Charts
- Batter-side splits
- Game, scrimmage and practice splits

Guardian access is limited to explicitly linked players.

18

PLAYER DEVELOPMENT

Move beyond recordkeeping.

Command9 helps coaching staffs organize the long-term development of their players.

DEVELOPMENT TOOLS

- Player evaluations
- Draft evaluations
- Finalized evaluations
- Development checkpoints
- Skill ratings
- Coach observations
- Assigned drills
- Historical evaluation preservation
- Season-specific development tracking
- Soft-archived history

Finalized evaluations remain protected from accidental rewriting.

PITCHING CURRICULUM

Build a repeatable development system.

Coaches can create a season-specific pitching curriculum organized into structured weeks.

CURRICULUM TOOLS

- Weekly themes
- Development phases
- Mechanics focus
- Key drills
- Live-game application
- Coach notes
- Active curriculum week
- Completion status
- Drill assignments
- Historical preservation

A team can organize its pitching instruction into a consistent plan instead of relying on disconnected practice notes.

DRILL LIBRARY

Keep the staff aligned.

Command9 provides a Team-scoped Drill Library for repeatable coaching instruction. Drill records can include:

DRILL RECORDS

- Name
- Category
- Description
- Equipment
- Recommended weeks
- Coaching cues
- Duration
- Player count
- Difficulty
- Video reference
- Active or archived status

Drills can be connected to curriculum weeks and player development evaluations.

21

SHARED PRACTICE PLANS

Put every coach on the same page before practice begins.

Head Coaches and authorized staff can upload and organize practice plans for the current Team and season.

PRACTICE-PLAN TOOLS

- Upload practice-plan documents
- Secure coach-only storage
- Mobile document preview
- Current-season organization
- Practice-specific plan assignments
- Station schedules
- Coaching responsibilities
- Equipment requirements
- Timing and rotation details
- Development objectives
- Authorized staff access
- Historical plan preservation

Each member of the coaching staff can review the same plan before arriving at the field — helping practices start faster, stay organized and deliver consistent instruction.

Practice plans remain protected from parents and unrelated teams unless a coach intentionally publishes a family-safe version.

22

PRACTICE FOCUS

Let families know what the team is working on.

Coaches can assign clear focus areas to every practice event. Examples include:

FOCUS AREAS

- | | |
|---------------|------------------------|
| — Baseball IQ | — Catching |
| — Baserunning | — Live Reps |
| — Fielding | — Outfield |
| — Mechanics | — Infield |
| — Pitching | — Situational Baseball |
| — Hitting | — Team Defense |

Practice-focus labels appear with the event so parents and players can see what will be emphasized before arriving. This helps families:

FOR FAMILIES

- | | |
|---|---|
| — Understand the purpose of each practice | — Reinforce current development priorities |
| — Prepare players for the session | — Follow the team's progression throughout the season |
| — Bring the correct equipment | |

Coaches retain control of internal practice plans, while families receive a concise and useful view of the upcoming practice focus.

TEAM COMMUNICATION

Keep team communication inside the team.

Command9 includes a Team-scoped communication experience.

COMMUNICATION TOOLS

- Team chat
- Coach and guardian display names
- Message history
- Likes and reactions
- Read status
- Unread counts
- Edit and delete controls
- Pinned team information
- Day-based message grouping
- Team-specific access

Team communication remains separated from unrelated organizations and teams.

TEAM DIRECTORY

The Team directory can provide authorized users with a clear view of:

DIRECTORY

- Players
- Player photos
- Jersey numbers
- Coaches
- Coaching roles
- Staff titles
- Current-season assignments

Private contact information remains protected.

PLAYER PROFILES

Each player can have a structured team profile containing authorized information such as:

PROFILE FIELDS

- First name
- Last name
- Jersey number
- Primary position
- Secondary position
- Bats
- Throws
- Graduation year
- Walk-up song
- Player photo
- Roster status
- Attendance
- Authorized private data

Public roster views and guardian/coach views expose only information appropriate to that user's role.

TEAM RESOURCES

Command9 gives teams a central place for important seasonal information. Resources may include:

RESOURCES

- League rules
- Team expectations
- Rainout information
- Field information
- Practice plans
- Coaching guides
- Development materials
- Team documents

Team-scoped resources prevent one organization's content from appearing inside another team.

PERSONALIZED TEAM EXPERIENCE

Each team can customize its identity inside Command9.

TEAM BRANDING

- Team logo
- Primary brand color
- Secondary brand color
- Accent color
- Team name
- Organization identity
- Division
- Light and dark presentation
- Team-specific header experience

Platform-level administration remains clearly separated from each team's branded daily experience.

MOBILE-FIRST BY DESIGN

Command9 is designed around the way coaches and families actually use a team app.

MOBILE EXPERIENCE

- Responsive phone layout
- Floating five-tab navigation
- Home
- Schedule
- MyStats
- Team Chat
- More
- Quick-access player card
- Expandable player profile
- Coach tools inside the same team shell
- Full-screen Scorekeeper
- Mobile Bullpen tracker
- Mobile livestream viewer
- Light and dark modes
- iPhone Home Screen support

Coaches do not need to return to a desktop computer to manage the game.

BUILT WITH RESPONSIBLE ACCESS

Command9 uses role-based access and Team-scoped authorization to protect every organization.

PLATFORM SAFEGUARDS

- Protected backend functions
- Exact Team and season validation
- Organization-level access
- Team-level access
- Role-based capabilities
- Guardian-to-player authorization
- Assistant Coach assignment checks
- Cross-Team isolation
- Duplicate-record integrity checks
- Fail-closed authorization
- Sanitized audit details
- Append-only Team audit history
- No routine audit deletion
- Signed video playback
- Protected private player information

Access follows the authenticated user, the exact Team and the exact Player relationship — not a name, email guess or frontend-only role check.

DESIGNED FOR THE ENTIRE PROGRAM

COACHES

- Manage rosters and staff
- Build schedules
- Track attendance
- Score games
- Broadcast live
- Monitor pitchers
- Record pitch locations
- Review Spray Charts
- Build development plans
- Manage drills and curriculum
- Communicate with families

PLAYERS

- View their team
- Track participation
- Review pitching history
- Understand development
- Build a season and career profile

PARENTS AND GUARDIANS

- View linked players
- RSVP
- Follow the schedule
- Receive team information
- Watch authorized livestreams
- Watch signed replays
- Review MyStats
- Stay connected without accessing unrelated players

ORGANIZATIONS

- Manage multiple teams
- Support multiple divisions
- Maintain Team-level branding
- Separate organization and team permissions
- Preserve historical seasons
- Create a consistent baseball experience across the program

WHY COMMAND9?

Because running a baseball team involves more than a schedule.

**IT IS THE ROSTER.
THE COACHING STAFF.
THE PRACTICES.
THE COMMUNICATION.
THE ATTENDANCE.
THE PITCH COUNTS.
THE PLAYER DEVELOPMENT.
THE LIVE GAME.
THE FAMILIES FOLLOWING ALONG.**

| **Command9 brings all of it together.**

BUILT FOR THE GAME. MADE FOR THE TEAM.

COMING SPRING 2027

Command9 is currently preparing for pilot programs with select teams and baseball organizations.

PILOT OPPORTUNITIES

We are looking for coaches and organizations interested in helping shape the next generation of baseball team management.

PILOT PARTICIPANTS MAY RECEIVE

- Early platform access
- Guided onboarding
- Direct product feedback opportunities
- Team setup assistance
- Early access to The Bullpen
- Early access to Scorekeeper and Command9 Live
- Input into future development priorities

Get Involved

BRING COMMAND9 TO YOUR PROGRAM.

BUILT FOR THE GAME. MADE FOR THE TEAM.
